25. No Debate During Voting – No members shall speak to any question after it has been put by the Chairman, nor during a vote, except to a point of order.

26. Voting Procedure – No member shall be allowed to vote on any show of hands or ballot who was not present when the question was first put. Every member present must vote, but in the event of a member's refusal to vote, he shall be assumed to have voted in the negative. 2020 AGM Rules of Procedure and Debate and Conduct of Meetings

No amendment, adjournments or debate shall be allowed on such motion, which shall be immediately put by the Chairman.

32. Suspension – If any member be suspended, his suspension on the first occasion shall be for the remainder of that sitting; on the second occasion for the sitting of two consecutive meetings; and on the third occasion may, in the case of a member of the State AGM, Board, District Branch or Sub Branch Committees, have his seat thereon declared vacant.

33. Points of Order – In all cases where a point of order is raised, the member raising the same shall state his point of order clearly and distinctly and with the omission of any irrelevant details. 35. Suspension of Standing Orders

– It shall be competent, by a two-third majority vote of the members present and voting, to suspend the Standing Orders, provided the effects of such suspension shall not be the rescission of Rule 34, and provided, further, that the suspension of the Standing Orders shall be limited in its operation to the particular purpose for which the suspension has been sought.

36. Re-Committing Resolution

– No resolution passed by a meeting shall be again debated or re-committed at the same meeting unless two thirds of the members present and entitled to vote so agree.

37. Objection to Validity of Vote – Subject to these Rules, the Chairman shall be sole and absolute judge as to the validity of any vote cast on any question, and unless objection to the validity of any vote is raised immediately after the Chairman has declared the result of the vote thereon, its validity cannot be again raised at any subsequent stage of the meeting.

1 Summary of significant accounting policies

This note provides a list of all significant accounting policies adopted in the preparation of this consolidated financial report. These policies have been consistently applied to all the years presented, unless otherwise stated. The financial report are for the Group consisting of Returned & Services League of Australia (Queensland Branch) and its subsidiary.

(a) Basis of preparation

This general purpose financial report has been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board, the *Collections Act 1966 (Qld)*, the *Australian Charities and Not-for-profits Commission Act 2012 (ACNC Act 2012)* and the *Charitable Fundraising Act 1991 (NSW)*. Returned & Services League of Australia (Queensland Branch) is a not-for-profit entity for the purpose of preparing the financial report.

(i) Compliance with Australian Accounting Standards - Reduced Disclosure Requirements

The consolidated financial report of the Group complies with Australian Accounting Standards - Reduced Disclosure Requirements as issued by the Australian Accounting Standards Board (AASB).

(ii) Historical cost convention

The financial report has been prepared on a historical cost basis, except for certain financial assets measured at fair value.

(iii) New and amended standards adopted by the Group

The Group has applied the following standards and amendments for the first time in their annual reporting period commencing 1 January 2019:

- AASB 16 *Leases*
- AASB 15 *Revenue from Contracts with Customers*
- AASB 1058 *Income of Not-for-Profit Entities*

The Group had to change its accounting policies and include additional disclosures following the adoption of AASB 15. The Group elected to adopt the new rules retrospectively and recognised the cumulative effect of initially applying the new standard on 1 January 2018. This is disclosed in note 2.

The Group had to change its accounting policies as a result of adopting AASB 16. The Group elected to adopt the new rules retrospectively but recognised the cumulative effect of initially applying the new standard on 1 January 2019. This is disclosed in note 2.

The other amendments listed above did not have any impact on the amounts recognised in prior years and are not expected to significantly affect the current or future years.

(iv) New standards and interpretations not yet adopted

There are no standards that are not yet effective and that would be expected to have a material impact on the entity in the current or future reporting years and on foreseeable future transactions.

(v) Critical accounting estimates

The preparation of the financial report requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are:

- Estimated impairment of financial assets - note 1(m)
- Estimated impairment of non-financial assets - note 1(f)

1 Summary of significant accounting policies (continued)

(a) Basis of preparation (continued)

(vi) Comparatives

Comparatives have been reclassified, where appropriate, to enhance comparability.

(b) Principles of consolidation

The consolidated financial report incorporates the assets and liabilities of all subsidiaries of Returned & Services League of Australia (Queensland Branch) ('parent entity') as at 31 December 2019 and the results of its subsidiary for the year then ended. Returned & Services League of Australia (Queensland Branch) and its subsidiary together are referred to in this financial report as the Group or the consolidated entity.

(i) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity where the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The Returned & Services League of Australia (Queensland Branch) has a single subsidiary, Mates4Mates Limited, of which the Returned & Services League of Australia (Queensland Branch) is the single member of the company.

(c) Revenue recognition

Revenue from contracts with customers is recognised by reference to each distinct performance obligation in the contract with the customer. Revenue from contracts with customers is measured at its transaction price, being the amount of consideration which the Group expects to be entitled in exchange for transferring promised goods or services to a customer, net of goods and service tax, returns, rebates and discounts. Transaction price is allocated to each performance obligation on the basis of the relative standalone selling prices of each distinct good or services promised in the contract. Depending on the substance of the contract, revenue is recognised when the performance obligation is satisfied, which may be at a point in time or over time.

The Group recognises other revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Group's activities as described below. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Revenue is recognised for the major business activities using the methods outlined below.

(i) Lottery ticket sales

Revenue primarily comprises funds raised from sales of lottery tickets. Revenue is recognised at a point in time once the lottery has closed and the lottery is drawn. Revenue for lotteries which have not been closed and drawn are treated as a contract liability.

(ii) Sale of goods

Revenue from the sale of goods is recognised at the point in time when the Group delivers a product to the customer.

(iii) Lease income

Lease income on investment properties is accounted for on a straight-line basis over the lease term. Contingent rentals are recognised as income in the periods when they are earned.

1 Summary of significant accounting policies (continued)

(c) Revenue recognition (continued)

(iv) Interest income

Interest income is recognised using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

(v) Dividends

Dividends are recognised as revenue when the right to receive payment is established.

(d) Income tax

No provision for income tax has been raised as the Returned & Services League of Australia (Queensland Branch) operates solely as a charitable non-profit group. It is established to promote the interests and welfare of former and serving members of the Australian Defence Force and their dependants, in order to carry out commemorative and patriotic activities. Accordingly, the Returned & Services League of Australia (Queensland Branch) is registered as a Taxation Concession Charity (TCC) by the Australian Charities and Not-for-profits Commission (ACNC) and as such is not liable for income tax as the Group maintains such registration.

(e) Leases

As explained in note 1(a) above, the Group has changed its accounting policy for leases where the Group is the lessee. The new policy is described below and the impact of the change is outlined in note 2.

Up to 31 December 2018, leases in which a significant portion of the risks and rewards of ownership were not transferred to the Group as lessee were classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

The Group leases various premises and vehicles. Rental contracts are typically made for fixed periods of 12 months to 5 years, but may have extension options as described below.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Until the 2018 financial year, leases of property, plant and equipment were classified as either finance leases or operating leases. From 1 January 2019, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable,
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date,
- amounts expected to be payable by the Group under residual value guarantees,
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

1 Summary of significant accounting policies (continued)

(e) Leases (continued)

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received,
- makes adjustments specific to the lease, eg term and security.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability,
- any lease payments made at or before the commencement date less any lease incentives received,
- any initial direct costs, and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT equipment and small items of office furniture.

Extension and termination options

Extension and termination options are included in a number of property and equipment leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor.

(f) Impairment of assets

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting year.

1 Summary of significant accounting policies (continued)

(g) Cash and cash equivalents

For the purpose of presentation in the consolidated statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term and highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(h) Trade receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within 30 days and are therefore all classified as current. Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The Group holds the trade receivables with the objective of collecting the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method.

The Group applies the AASB 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables and contract assets.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The contract assets have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets. The expected loss rates are based on the payment profiles of sales over a period of 36 month before 31 December 2019 or 1 January 2019 respectively and the corresponding historical credit losses experienced within this period.

(i) Inventories

(i) Goods

Inventories of goods purchased for resale are valued at cost less provision for obsolete inventory. The cost of bringing each item to its present location and condition is determined on a first-in, first-out basis. Recoverable amount is based on lower of cost and replaceable cost if the entity was deprived of the asset.

(ii) Art Union properties

Art Union properties which have not yet been included as a prize in a lottery draw at 31 December 2019 are included in the consolidated balance sheet as inventories and recorded at cost less provision for impairment.

(j) Property, plant and equipment

Property, plant and equipment is stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting year in which they are incurred.

Depreciation is calculated using the straight-line method to allocate the cost of the assets, net of their residual values, over their estimated useful lives or, in the case of leasehold improvements, the shorter lease term as follows:

• Buildings	2.5%
• Plant and equipment	10% - 40%
• Leasehold improvements	5%
• Motor vehicles	12.5% - 20%

1 Summary of significant accounting policies (continued)

(j) Property, plant and equipment (continued)

The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting year.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 1(f)).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss.

(k) Investment properties

Investment properties are held for long-term rental yields and are not occupied by the Group. They are carried at cost including transaction costs, less accumulated depreciation and impairment charges.

Investment properties (other than land) are depreciated over their useful lives to the Group commencing from the time the asset is held ready for use. Depreciation is calculated on a straight line basis over the expected useful economic life of the assets at 2.5%.

(l) Intangible assets

(i) Software

Costs associated with maintaining software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group are recognised as intangible assets.

The Group amortises software with a limited useful life using the straight-line method at 10% - 40%.

(m) Investments and other financial assets

(i) Classification

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in equity instruments, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

(ii) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

(iii) Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are two measurement categories into which the Group classifies its debt instruments:

1 Summary of significant accounting policies (continued)

(m) Investments and other financial assets (continued)

(iii) Debt instruments (continued)

Bank fixed rate term deposits (note 9)

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented in other gains/(losses) in the statement of profit or loss.

Corporate bonds and bank notes (note 15)

FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses).

(iv) Equity instruments

Equity securities and managed funds (note 14)

The Group subsequently measures all equity investments at fair value. The Group's management has not elected to present fair value gains and losses on equity investments in other comprehensive income. Changes in the fair value of financial assets at fair value through profit or loss are recognised in other gain/(losses) in the statement of profit or loss as applicable.

Dividends from such investments continue to be recognised in profit or loss as other income when the Group's right to receive payments is established.

(v) Impairment

The Group assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the Group applies the simplified approach permitted by AASB 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

(n) Trade and other payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months from the reporting date. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

(o) Employee benefits

(i) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities for annual leave are presented as current employee benefit obligations in the consolidated balance sheet. The liabilities for wages payable are presented as current other payables in the consolidated balance sheet.

1 Summary of significant accounting policies (continued)

(o) Employee benefits (continued)

(ii) Other long-term employee benefit obligations

The Group has liabilities for long service leave and annual leave that are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the end of the reporting period of corporate bonds with terms and currencies that match, as closely as possible, the estimated future cash outflows. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

The obligations are presented as current liabilities in the consolidated balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting date, regardless of when the actual settlement is expected to occur.

(iii) Retirement benefit obligations

Contributions to the defined contribution section of the Group's superannuation plan and other independent defined contribution superannuation funds are recognised as an expense as they become payable. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(p) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the consolidated balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the taxation authority, are presented as operating cash flows.

2 Changes in accounting policies and prior year restatement

(a) AASB 16 Leases

As indicated in note 1(a) above, the Group has adopted AASB 16 *Leases* retrospectively from 1 January 2019, but has not restated comparatives for the 2018 reporting year, as permitted under the specific transition provisions in the standard. The reclassifications and the adjustments arising from the new leasing rules are therefore recognised in the opening balance sheet on 1 January 2019. The new accounting policies are disclosed in note 1(e).

On adoption of AASB 16, the Group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of AASB 117 *Leases*. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 January 2019 was 7.43%.

(i) Practical expedients applied

In applying AASB 16 for the first time, the Group has used the following practical expedients permitted by the standard:

- applying a single discount rate to a portfolio of leases with reasonably similar characteristics,
- relying on previous assessments on whether leases are onerous as an alternative to performing an impairment review - there were no onerous contracts as at 1 January 2019,
- accounting for operating leases with a remaining lease term of less than 12 months as at 1 January 2019 as short-term leases,
- excluding initial direct costs for the measurement of the right-of-use asset at the date of initial application, and
- using hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

The Group has also elected not to reassess whether a contract is, or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date the Group relied on its assessment made applying AASB 117 and Interpretation 4 *Determining whether an Arrangement contains a Lease*.

(ii) Measurement of right-of-use assets

The associated right-of-use assets were measured at the amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the consolidated balance sheet as at 31 December 2018.

(iii) Adjustments recognised in the consolidated balance sheet on 1 January 2019

The change in accounting policy affected the following items in the consolidated balance sheet on 1 January 2019:

- right-of-use assets - increased by \$3,139,147
- lease liabilities - increased by \$3,139,147.

(b) AASB 15 Revenue from Contracts with Customers

The Group has adopted AASB 15 *Revenue from Contracts with Customers* from 1 January 2019 which resulted in changes in accounting policies and adjustments to the amounts recognised in the financial report. In accordance with the transition provisions in AASB 15, the Group has adopted the new rules retrospectively and has restated comparatives for the 2018 financial year. In summary, the following adjustments were made to the amounts recognised in the consolidated balance sheet at the date of initial application and the beginning of the earliest year presented (1 January 2018):

(i) Accounting for costs to obtain a contract

During the year, a detailed review was undertaken over the historical treatment of direct sales commissions. These costs were capitalised and amortised over a period of time. On review of this treatment in the context of AASB 138 *Intangible Assets* and through review of the terms and conditions of the agreements and ticket sales it was determined that based on specific recognition criteria, this treatment was not appropriate and these costs should have been expensed as incurred.

Under AASB 15, incremental costs of obtaining contracts with customers are recognised as an asset. These are costs that the Group would not have incurred if the contract had not been obtained and includes direct sales commissions. As a result, the previously inappropriate treatment is now appropriate under AASB 15. The asset is amortised on a straight-line basis over the term of the specific contract it relates to, consistent with the pattern of recognition of the associated revenue.

(ii) Accounting for costs to fulfill a contract

In 2018, costs amounting to \$1,382,165 (31 December 2017: \$1,995,499) related to direct labour, material and other related services were expensed as they did not qualify for recognition as an asset under any of the other accounting standards. The increase in costs for the year ended 31 December 2018 of \$613,334 are reflected in "lottery prizes, marketing and commission expenses". However, the costs relate directly to the contract, generate resources used in satisfying the contract and are expected to be recovered. They were therefore capitalised as costs to fulfil a contract following the adoption of AASB 15 and included in other assets in the consolidated balance sheet on 31 December 2018. The asset is realised at a point in time when the draw occurs.

The Group classifies its financial assets as at amortised cost only if both of the following criteria are met:

- the asset is held within a business model whose objective is to collect the contractual cash flows, and
- the contractual terms give rise to cash flows that are solely payments of principal and interest.
